Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Nicholson (US. 4,203,608).

Nicholson discloses a seal for combustion engines, comprising at least one metal layer (layer of figure 8) having an outer edge region (outer edge of the metal layer) defining an outer-most perimeter (perimeter of the metal layer) of the at least one metal layer of predetermined shape at least one pass-through opening (on of the two center openings that are circular) formed in the at least one metal layer at a location spaced inwardly from the outer edge region (the opening is spaced inwardly from the outer region), a plurality of circumferential parallel profile sumps (two sumps that are parallel and running around the perimeter of the metal layer) formed in at least the outer edge region in circumferentially surrounding, unsymmetrical spaced relation (the plurality of sumps are unsymmetrical to the opening) to the at least one pass-through opening and having the shape of the outer most perimeter in combination with at least one inward profile sump (two inward profile sumps that surround the opening) spaced inwardly from and unsymmetrical relative to the plurality of circumferential, parallel profile sumps (the inward profile sumps are unsymmetrical to the plurality of sumps that are parallel to each other) and circumferential surrounding relation to the at least one pass-through opening (the inward profile

Art Unit: 3676

sump surrounds the opening) and having the shape of the at least one pass-through opening (the inward profile sump surrounds the opening).

Regarding claim 2: The profile sumps are formed as circumferential wave sumps (the plurality of sumps are circumferential wave sumps, figure 6).

Regarding claim 3: The profile sumps are circumferential saw-tooth profile (saw tooth formed in figure 4d).

Regarding claim 4: The profile sumps run parallel to one another (the profile sumps run parallel to each other) and have the same shape (figure 4d).

Regarding claim 5: The profile sumps run parallel to one another and have offset cross section (this is the case as seen the offset in figure 4e).

Response to Arguments

3. Applicant's arguments with respect to claims 1-5 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3676

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
